

## Filing Procedures – Multi-Part Documents

---

### **Introduction**

Because individual pleadings and motion reliefs require different responses from the Court and from the CM/ECF system, filing users are strongly encouraged to create a separate document for each pleading or motion relief.

However, if a filing user prepares a single document containing more than one pleading or more than one motion relief, the filing user must file the document as many times as there are pleadings or motion reliefs.

---

### **More Than One Pleading**

A filing user who prepares a single document that contains more than one pleading must file that document as many times as there are pleadings and use a separate entry for each filing.

For example, if filing one document that contains both the *Plaintiff's Response to Defendant's Motion to Dismiss* and the *Plaintiff's Motion to Amend Complaint*, the filing user would first file the document using the event *Response to Motion* – and link it to the *Motion to Dismiss*. Once the filing user received the NEF for the *Response* filing, the filing user would then file and attach the same document again, this time using the event *Motion* as a separate entry.

---

### **More Than One Motion for Relief**

A filing user who prepares a single document that contains more than one motion for relief must file that document as many times as there are motions for reliefs and use a separate motion relief entry for each filing.

For example, if filing one document that contains a motion to dismiss, a motion for summary judgment, and a motion to compel, the filing user would file and attach the same document three separate times as three separate motion reliefs.
